

Doosan Forklift Part

Doosan Forklift Parts - Doosan Infracore Company Ltd. is a transnational establishment consisting of Diesel Engines, Defense Industry goods, Industrial Vehicles, Construction Equipment and Machine Instruments and Mechanization Systems.

Their United States affiliate, Doosan Infracore America Corporation, stationed in Suwanee, Georgia houses a 170,000 square foot manufacturing facility, home to a Compact Equipment and Construction division. Cleveland, Surprise houses the Lift Truck division, and West Caldwell, New Jersey has a Machine Tool division. The U.S. headquarters in Georgia facilitates a first rate parts operation capable of supplying an excess of 25,000 line items to support Lift Truck, Compact Equipment, Machine Tool and Construction consumer requirements.

There are well over 220 Doosan service and product sales locations operating in Canada and the United States. Also, there are more than 90 independent sellers moving lift truck supplies and materials handling equipment. This system permits Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line remarkably features 63 distinctive versions consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle models vary from 3,000 to 33,000 lbs. All trucks are manufactured in an ISO 9001 qualified facility.

Doosan Infracore America is the fastest growing lift truck company in the North American marketplace, thanks to their stability in maintaining a high level of client service excellence and optimum product performance to all Doosan Infracore Lift Truck users. The U.S. forklift division based in Cleveland has a expert team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's original home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled forklifts as part of a national equipment expansion project. Early sales of this industrialized equipment focused on large business groups, the armed forces and on state-run companies. This ultimately led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical training became the new focus for improving quality and product development.

Domestic forklift trade for Daewoo started in 1967 and grew to an astounding 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of substantial expansion of their forklift operations.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling market. This project proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company completed development of a new facility to help in producing high end value-added products for export. In 1993, the corporation had a international sales network and started exporting versions they had developed through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into overseas markets.
