

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country trip in their RV. Newly retired, after spending numerous years working with his brother to develop their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road expedition.

During their trip, John reacquainted himself with previous business connections along the way. In combination with these conversations and a significant event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered an infinite marketplace for a product that could promptly and securely lift individuals in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a partnership with two friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they created and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing designs.

JLG lift trucks have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into numerous markets globally and develops new products to ensure customers are capable of being more efficient and perform in the workplace within a safer environment.
